

## PROJECT STATUS REPORT

<b>Project Name</b>	Lets Get Physical
<b>Blurb</b>	A mobile application where people in a community can share their physical activity stories to other people. This application hopes to inspire people by seeing other people achieve their physical activity in a day. The application itself will be a tool that will help the community to promote good health and healthy lifestyle.
<b>For Week Ending</b>	March 24, 2021
<b>Project Status</b>	90% Green and 9.99% Yellow
<b>Status Description</b>	<p>The current status of my project is green due to following reasons:</p> <ul style="list-style-type: none"><li>* 80% Green - On my vlog 1, I mentioned features I wanted to implement by the end of the week which is “like” functionality and displayed stories in news feed..</li><li>* 9.99 % Yellow - I have a class that requires a lot of attention and because of this I may lose quite a bit of time for this project.</li><li>* Plan to resolve the issue: this is actually not a plan anymore because I did it already. I decided to drop my part time job and focus on my studies.</li></ul>

### Activities—During the Past Week

As promised in my Vlog 1, I implemented likes and retrieving stories functionality. In my vlog, I also mentioned to develop a screen for added post in which I actually dropped (explanation on Project Changes section).

### Activities—Planned for Next Week

I plan to develop the following:

- Comment Modal
- Setup database that will hold comments from users
- Splash/loading screen
- If possible, refactor sign up/sign in, and post UI.

### Project Issues

No issues

### Project Changes

I made UI changes to my project:

- Replaced the bottom navigation bar and decided to go with drawer (hamburger) navigation.
- Not changed yet, but I plan to use modal instead to show the comments. As for the post review, I decided to drop it because I don't see the point of having a dedicated screen for recently added data as it's going to be displayed on news feed anyway.

### Reflection

---

What progress do you particularly feel good (great) about? I'd say I'm still on track because of the features I implemented.

What barriers (if any) do you feel is/are a current impediment to success? Time constraint

What help (if any) do you require to move positively forward? Nothing at the moment

What questions or concerns do you have (if any)?] Nothing at the moment

---
